

How Asphalt Plants are Increasing Production & Profits with a Genius Batch Weighing System

Tired of inaccurate and slow weighing processes... production reporting and not being able to maximise your plants efficiency with your current systems or technology?

What Makes An Automated Genius Batching Solution So Powerful and Competitive...

The Genius are state-of-the-art computerised automated systems developed by our own software engineers, based on over 40 years' experience in the weighing industry. The batching systems are used in a variety of applications and processes.

- Plant operation and monitoring
- Repeatable batch weigh accuracy
- Full product traceability
- 24/7 support & built-in diagnostics to minimize downtime
- Customised reporting
- Alarm and downtime summaries
- Mobile and tablet interface
- Real time batch data via Intranet / Internet
- Online accessibility including cloud reporting
- S88 compliant
- Web server technology
- Standard PC hardware
- Modular hardware & software, allows for ease of future expansion
- Seamless interface to ERP or other software packages

“Gordyn & Palmer were at the forefront of the batching system changes made back in the very late 70's with the Genius system, they were able to make changes from the very old mechanical / early electrical batching process systems that had no real support or back up into our plants. They built a system that had full control of plant, customers, mix designs that still remains and runs almost all the asphalt plants today. There really wasn't the expertise available to the local Australian market at the time when they developed Genius, their effort working with the industry has developed a system that has proved to be a winner for over 30 years in our business.”

Phil Olsson
Divisional Manager Asphalt Production
Fulton Hogan

“The Gordyn & Palmer Genius systems are trusted by us as a reliable system with high uptime. Customer service is responsive and always helpful.”

Marcus Caratti
Technical Analyst
