

Do you want your feedmill to have highly accurate control with real time data & the flexibility to monitor your process remotely?

Tired of inaccurate control and not being able to maximize your plants efficiency and production with your current systems or technology?

What makes the Genius Feedmill Control System so powerful and competitive...

The Genius are state-of-the-art computerised automated systems developed by our own software engineers, based on over 40 years' experience in the industry.

- Plant Operation and Monitoring
- Contamination Control
- Full product traceability
- Real time plant data via intranet / internet
- 24/7 support and built-in diagnostics to minimize downtime
- Real time trending of critical devices with history log
- Standard PC & PLC off the shelf hardware
- Modular hardware & software, allows for ease of future expansion
- Mobile and tablet interface
- Comprehensive reporting in Excel or PDF format
- Grain tempering & steam flaking
- Automatic hammermill and roll mill control
- Batch weighing & blend control
- Automatic press control
- Alarm & downtime summaries
- Webserver technology & Ethernet Communications
- Online accessibility including cloud reporting
- Seamless interface to third party software packages
- Interface to feedlot management software
- Customized to meet customer requirements

For over 25 years Gordyn & Palmer has had an association with our plants throughout Australia. Their employees are flexible and diligent in their work attitude and solve any outstanding issue that may arise providing 24/7 service.

Their batching and pelleting control systems utilize the latest hardware and software platforms that continually perform to a consistent standard. Genius control systems are reliable and robust. They provide live reporting that complete the information loop back into our general ERP system. We have also used their overall electrical knowledge for safety & category zoning with positive outcomes.

Our company has progressed with a continued steady working relationship with Gordyn & Palmer that remains to this day.

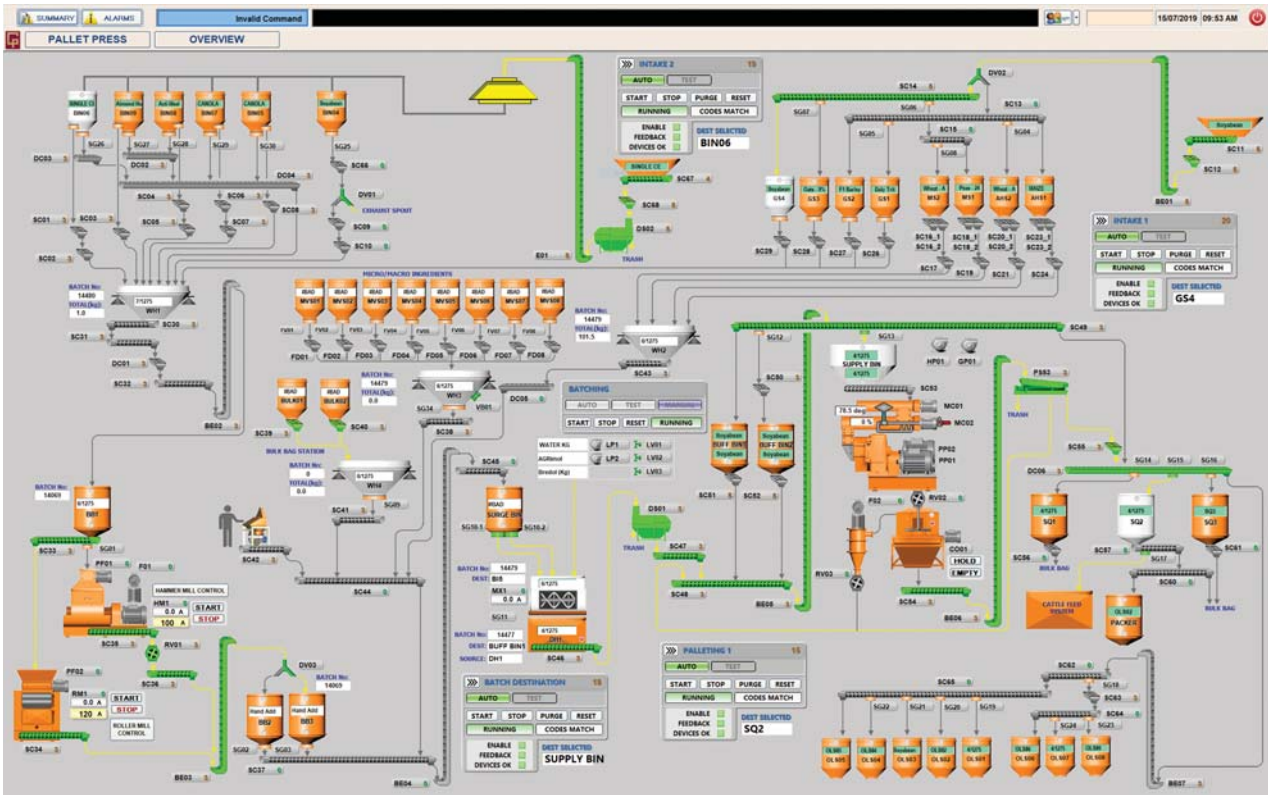

Dennis Porter
Engineering Projects Manager
Ridley AgriProducts

It is with much enthusiasm that I recommend the services of Gordyn & Palmer.

Gordyn & Palmer performed the electrical install, milling control and batching control programs of our new Feed Mill, Feed Batching and Mixing system at Whyalla Beef in Texas Queensland. They not only performed this task on time but to a standard that has left other equipment suppliers on this project commenting on the neatness and how professionally the end result turned out. During the project, the on-site Gordyn & Palmer staff were courteous, helpful and undertook their role as true professionals. They rose to every challenge this project handed out and the end result was exceptional quality. Their back up service has also been exceptional, and they have assisted in every challenge sent their way.

Raymond Beard Project Manager
Whyalla Beef – Texas QLD
